POWER X-CHANGE

**1 BATTERY.

POWER TOOLS

GARDEN

CORDLESS FREEDOM. FOR TOOL AND GARDEN.

At last – no more too short or severed cables.

When you have no longer to worry about extension cables that are too short or sufficient sockets. When the device comes to the project instead of the other way round. When you simply insert the battery and are ready to go, whether it is a lawn mower, garden pump, rotary hammer or wet and dry vacuum cleaner. Than that is the feeling of cordless freedom.

LATEST TECHNOLOGY. PROVEN QUALITY.

So you can enjoy using your machine for a very long time.

The Power X-Change batteries are the centerpiece of the platform. That is why we use only the best components such as high-performance Li-Ion cells and our intelligent ABS battery electronics in the batteries. This makes our PXC battery one of the safest in the industry and ensures efficiency, reliability and durability. Stiftung Warentest (11/2020 issue) confirmed its quality in a comparison test with eight batteries from eight different battery platforms. The 2.0 Ah battery from the Power X-Change battery system from Einhell beat off stiff competition to emerge as test winner.

POWERFUL MACHINES. LONG-LASTING BATTERIES.

No matter how large your project – Power X-Change won't let you down.

Less power? No way!

As a battery system for real enablers, our cordless machines offer up to 2700 Watt of battery power and 8 Ah of capacity, making them easily a match for corded machines! Whether you just want to hang a shelf or drill through a solid concrete wall, with Power X-Change you are equipped to meet any challenge with power and endurance.

1 BATTERY. 1000 POSSIBILITIES. FOR DIY ENTHUSIASTS AND HOBBY GARDENERS.

Just as versatile as you: Battery power for every situation.

Power X-Change is the first rechargeable battery system that provides hobby gardeners and DIY enthusiasts alike with an unrivaled selection of cordless tools. The PXC family already contains over 200 devices – and the number is constantly rising. Thanks to the versatile Power X-Change system, for instance, the electric kick scooter from GOVECS is “powered by Power X-Change”.

ACTIVE BATTERY MANAGEMENT SYSTEM. INTELLIGENT ELECTRONIC CONTROL SYSTEM.

The computer-assisted Active Battery Management System permanently monitors and controls all the safety-related processes of the electrical components and associated hardware. This results in a whole range of advantages:

- MAXIMISED RUNNING TIMES
- OPTIMISED TOOL POWER
- LONGER BATTERY SERVICE LIFE
- INCREASED SAFETY

TWIN-PACK® TECHNOLOGY. 18 V + 18 V = 36 V.

If a device needs more power than provided by a single 18 V rechargeable battery, we simply add a second battery so we generate $18\text{ V} + 18\text{ V} = 36\text{ V}$. We call that Twin-Pack® Technology. If the voltage (V) gets doubled, the power (W) gets doubled, too.

Double Twin-Pack Technology in turn makes it possible to work for even longer still without the nuisance of recharging. In this case, four rechargeable batteries are used. When the power of the first two batteries finally runs out, the system automatically switches over to the two additional batteries.

POWER X-CHANGE PLUS.

Rechargeable batteries vary not just in terms of running time and weight. What is also critically important is the power that they provide. Power X-Change PLUS Technology makes more power available from the same number of cells, so that you can work with plenty of power even on challenging applications as well.

If, for example, you want to use your angle grinder for cutting work, the running time (see Ah rating) is generally not critical. Sufficient power, on the other hand, is. A car is a useful comparison. Uphill or when overtaking, more power, in other words more hp respectively kW, is needed.

BRUSHLESS ENERGY – MORE EFFICIENT WORK.

Various Power X-Change devices are equipped with brushless motors. They offer significant advantages compared to carbon brush motor:

- MORE POWER
- LONGER RUNNING TIMES
- LONGER SERVICE LIFE
- MORE COMPACT DESIGN
- MAINTENANCE-FREE

BATTERY EXPERTISE. CONVINCING. AGAIN AND AGAIN.

"We are incredibly proud to have done so well in a race with the very top competitors and to have been able to demonstrate our battery expertise so clearly. We are battery test winners"

Andreas Kroiss, CEO Einhell Germany AG

WE ARE TEST WINNERS. BY STIFTUNG WARENTEST.

And the test winner is... Einhell!

In the comparison test performed by Stiftung Warentest (11/2020 issue) covering eight batteries from eight different battery platforms, the 2.0 Ah battery from Einhell's Power X-Change battery system beat off stiff competition. Our battery put in a convincing performance when it came to durability, handling and safety. Having already achieved top marks with Power X-Change machines in

previous Stiftung Warentest comparisons, we are all the more delighted that one of the batteries we have spent so much time developing and refining came out of the test on top. This confirms the decision we took years ago to bundle our expertise in the battery technology sector in order to continue expanding the leading role of our Power X-Change battery system.

DOUBLE TWINPACK TECHNOLOGY

Double Twinpack devices have slots for two additional rechargeable batteries. If, for example, two additional batteries are inserted in the GP-CM 36/47 S HW Li lawn mower, such that all four rechargeable battery slots are filled, you can mow double the area without recharging.

Example (GP-CM 36/47 S HW Li):
Twinpack 2x 18 V = 350 m²
Double Twinpack
2x 18 V + 2x 18 V =
350 m² + 350 m² = 700 m²

TWIN-PACK® TECHNOLOGY

If a device needs more power than provided by a single 18 V rechargeable battery, we simply add a second battery so we generate 18 V + 18 V = 36 V. We call that Twin-Pack® Technology. If the voltage (V) gets doubled, the power (W) gets doubled, too.

EVEN MORE FREEDOM WITH POWER X-CHANGE. E-KICKSCOOTER ELMOTO KICK FROM GOVECS.

Einhell opens up its Power X-Change rechargeable battery platform! Together with E-Scooter manufacturer GOVECS, Einhell is helping to get ELMOTO KICK on the road, a road-legal E-Kickscooter with Power X-Change batteries.

With the new E-Kickscooter ELMOTO KICK from GOVECS, emissions-free scooting means you can leave your car at home or park slightly further away and simply jump on the scooter for the last mile.

ELMOTO KICK

- Approval for road use: yes
- Battery voltage: 2x 18 = 36 V
- Top speed: 20 km/h
- Range: up to 15 km
- Brakes: 2 hydraulic disc brakes
- Size of pneumatic tyres: 10 inches
- Product weight: 15.0 kg (excl. batteries)

Article only available without batteries / chargers Art. No. 48.500.61

The ELMOTO KICK is available in two additional colours at www.govecs.de:

- Particularly sturdy frame and large pneumatic tires with hydraulic disk brakes for superior ride comfort and highest safety
- LCD display – speed, battery status, range
- Folding handlebar with lock and carry function

IT'S YOUR CHOICE.

WHAT DOES MULTI-AH MEAN?

Thanks to MULTI-Ah technology, switching over from a 5 Ah battery to a 8 Ah battery is really easy and can be done with just the push of a button. The 5 Ah battery has a 3x longer total service life and is suitable for lighter applications (e.g. cordless lamp or cordless screwdriver). The 8 Ah battery offers the maximum running time for more capacity-intensive applications (e.g. cordless lawn mower or cordless wet and dry vacuum cleaners).

5 Ah ➤ **300%**
+ more service life ¹⁾

8 Ah ➤ **60%**
+ more running time ²⁾

¹⁾ In comparison to every standard lithium-ion battery

²⁾ In comparison to the 5 Ah battery

4.0 Ah BATTERY – 4.0 Ah PLUS BATTERY. WHERE'S THE DIFFERENCE?

By switching to the new “21700” cell format (21 mm diameter, 70.0 mm length) our latest Power X-Change batteries have acquired the best combination of power/running time and weight.

Why? Using this cell technology it is possible to achieve the same power and running time with five cells instead of the previous ten.

Benefits? The new batteries are 12% lighter and 13% more compact than their predecessors – at 100% power and running time.

Results: Light-weight all-rounders for energy-intensive applications such as in cordless chainsaws.

POWER X-CAR CHARGER

PROTECTION ELECTRONICS FOR THE CAR BATTERY

1. The car battery is weak:
Charging stops and both indicator lights blink in alternation – the car battery is protected from further discharge.
In this state the car can still be started.

2. The car battery is empty:
The indicator lights go out – the car battery is protected from exhaustive discharge.
